PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience designing, developing, and scaling high-performance web and mobile applications. Strong expertise in React, Node.js, Django, RESTful APIs, and relational databases with hands-on experience in real-time systems, state management, and backend architecture. Proven track record of modernizing legacy applications, improving performance, and delivering production-ready features end-to-end. Adept at working in Agile/Scrum environments, collaborating cross-functionally, and owning features from system design to deployment.

Skills

Programming Languages: JavaScript, TypeScript, Python, SQL

Frameworks & Libraries: React.js, Django, Express.js, Node.js, Flutter, Redux

Web Development: HTML, CSS

Tools & Software: AWS, VSCode, Visual Studio, Postman

Experience

UI Developer (Consultant) – GE Vernova
June 2023 – Present

- Developed and optimized a large-scale web application using React.js, enhancing application performance and user experience.
- Participated in feature development for Wind SCADA NXT, ensuring functionality met user requirements and project goals.
- Implemented REST API calls to reduce load times, improving data retrieval and overall application efficiency.
- Collaborated with cross-functional teams, including backend developers, QA engineers, and product managers, to ensure timely delivery of project milestones.
- Debugged and resolved application issues, leading to a more stable and user-friendly platform.
- Migrated legacy code to work with the latest Node.js packages, modernizing the codebase and improving maintainability.
- Created React higher-order components (HOCs) for reusability across different modules, reducing development time and code redundancy.
- Integrated WebSocket data into components, optimizing data handling and reducing unnecessary renders to boost performance.

Full-Stack Developer – Belcan
March 2022 – June 2023

- Developed a web application from scratch using React.js for the frontend and Django for the backend, delivering a robust and scalable solution.

- Developed and deployed a comprehensive HR onboarding process web application using Django.
- Utilized Django's ORM to efficiently interact with the database, modeling complex data for employee information, documents, and workflows.
- Implemented robust RESTful APIs using Django REST Framework to enable seamless communication between the frontend and backend.
- Leveraged Django's serializer framework to serialize and deserialize data, ensuring data integrity and efficient data transfer.
- Implemented user authentication and authorization mechanisms using Django's built-in authentication system and custom permissions.
- Utilized Dash Plotly for visualizing predicted data on web pages, providing interactive and insightful data presentations.

Mobile Developer Intern – UIPRO

July 2021 – December 2021

- Developed mobile applications compatible with both Android and iOS using Flutter, creating cross-platform solutions.
- Integrated APIs to enable communication between the app and backend services, ensuring seamless data exchange.
- Utilized Firebase for cloud storage of user data, enhancing data management and synchronization.
- Managed application state with the Provider module, ensuring efficient state management and improved performance.
- Worked both independently and as part of a team, contributing to the timely delivery of project milestones.

Full-Stack Developer Intern – HostelOwner.com

March 2021 – May 2021

- Developed a full-stack web application for multiple clients to collect and analyze customer data using Express.js for the backend and EJS templates for the user interface.
- Created and maintained RESTful APIs for a SaaS application, enabling data access and integration with various client applications.

Education

Bachelor of Technology in Computer Science

June 2018 - May 2022

ICFAI university

Certifications

HackerRank React Certification

18th Nov 2022
